

Industrial Tooling & Supply, Inc.

Vendor Managed Inventory Program

At ITS we utilize the best software and equipment available for our industrial market clients. Along with our superior equipment, we have an entire team devoted to the daily operations of our customer's needs. From data entry, trouble shooting and our technical sales staff, our inventory management program allows as our customers to focus on manufacturing while we handle the rest.

Here are a few advantages of an ITS system:

- Reduce 20%-50% of your inventory spend.
- Automate ordering, receiving, stocking, and maintaining inventory.
- 24-7 availability with accountability for employee transactions.
- 100% inventory visibility: Reduce stock-outs and obsolete inventory.
- Significantly reduce consumption, hoarding, and theft.
- Control employee and department spending.
- Turn your inventory data into actionable information.
- Improve job costing, inventory forecasting, and demand planning.
- Reduce travel-time and other non-value-added activities.
- Access control by item, department, employee, job, machine, etc. for complete inventory control.
- Increase use of re-grinds and reconditioned items.
- Reclaim floor space.

Industrial Tooling & Supply, Inc.

- Manage gauge calibration.
- Lot control and FOD control.
- Consigned and Non-Consigned Inventory
- Monitored Connectivity Loss
- Nightly Backups of Database

Reporting:

ITS can customize reports to our client's exact needs. From item, machine, user, Job, traveler, FOD tracking and more. With over 2,000 standard reports and an infinite number of custom reports, we can dial in our customer's exact purpose and activity for analytical review. ITS can also interface with most client's current ERP system for real time data, purchasing and receiving tools, AP/AR, warehousing and material and EDI management.

After Implementation Service and Features

It is easy to install a vending system and reap the rewards of the products being purchased. ITS takes our system much further. Setting up and going live with our system is just the start. It is the processes we complete next that set us apart from our competitors with the following features:

- Continual product testing to improve production
- Monitoring inventory spikes for cause
- Same day delivery for items that may have had a greater than usual run and are stocked out
- Quarterly cost savings meetings to review system health, projects and identification of future process improvements
- Monitoring and proactive practice of future product obsolescence from manufacturers
- 24/7 on-call support
